STEP-BY-STEP OPERATIONS GUIDE

Student Management & Transport

Admissions, student profiles, fee collection, transport setup and route management

Purpose. Use this guide to complete the common student and transport tasks in the school management system. Follow the menu paths and steps in order.

Quick navigation

Task	Where to start
Admission and 360 profile	Sidebar > Students > Student List
Fee collection	Sidebar > Fees > Fee Management
Transport setup	Student Admission or Student 360 > Transport
Route management	Sidebar > Transport > Routes

1. Admit a student and view the 360 profile

A. Add a new student

1. Open the sidebar and hover over Students.
2. Click Student List. The Student Management main page opens.
3. Click the Student Admission button.
4. Enter the required personal information in the admission form.
5. Click Submit to complete the admission.

B. Open the student 360 profile

1. On the Student List page, find the required student.
2. Click the student's 360 button to open the complete profile.
3. Review the profile category by category. Categories can include Transport, Fees, Attendance, Scores and other available student information.

> **Use the 360 profile** Open this profile when you need to inspect one student's full information or manage their transport details.

2. Collect a student fee

Menu path: Sidebar > Fees > Fee Management

1. Open the sidebar and hover over Fees.
2. Click Fee Management. The fee management page opens with the student list.
3. Find the student and click Collect.
4. In the fee collection modal, select the month for which you are collecting the fee.
5. Select the applicable fee type.
6. Enter the amount to collect and review the selected month, fee type and amount.
7. Click Submit to complete the fee collection.

Before submitting Check that the student, month, fee type and amount are correct.

3. Enable transport during new student admission

Use this flow when the student is being registered for the first time and needs school transport.

1. Open Student Admission and complete the required student information.
2. Find the Enable Transport option and check the box.
3. Select the student's transport area.
4. Select the required month.
5. Submit the admission form.

Expected result The student is registered with transport enabled and can be considered for route assignment when creating a route.

4. Add transport for an already-registered student

Use this flow when the student already exists in the system.

1. Open the sidebar, hover over Students and click Student List.
2. Find the student and click the 360 button.
3. In the profile header, click Transport.
4. Click Edit.
5. Select the required route and month using the available fields.
6. Save the changes. The student is added to transport.

5. Remove a student from transport

1. Open the student's 360 profile from Student List.
2. Click Transport in the profile header.
3. Click Edit to update the transport settings.
4. Disable transport for the student.
5. Save the change if the screen presents a save action, then verify the transport status.

Important dependency A student must already be added to transport to appear in the student list when creating or assigning a route. If a student is missing from the route setup list, first check that transport has been enabled and saved.

Note: Disabling transport removes the student from transport participation. Removing a student from one route only is a separate action described in Section 7.

6. Create a route and assign students

Menu path: Sidebar > Transport > Routes

1. Open the sidebar and hover over Transport.
2. Click Routes. The route dashboard opens.
3. Click Quick Route.
4. Enter the route name.
5. Select the route time.
6. Select the driver and helper.
7. Select the students to include. Only students already added to transport should be available for route assignment.
8. Review the route name, time, driver, helper and student list, then click Save.

> **If a student is not listed** Return to Student List, open the student's 360 profile and confirm that transport has been enabled and saved before trying again.

7. Remove a student from an existing route

1. Open the sidebar and go to Transport > Routes.
2. On the route dashboard, find the route that needs to be updated.
3. Click the Edit button on that route card.
4. Find the student in the route's student list.
5. Click the Delete button next to that student.
6. Click Save to apply the route changes.

Final verification checklist

- ☐ The student admission form was submitted successfully.
- ☐ The correct student 360 profile was opened before editing student details.
- ☐ Fee month, fee type and amount were checked before submission.
- ☐ Transport is enabled and saved before trying to assign a student to a route.
- ☐ The correct route, driver, helper and student list were saved.
- ☐ After removing a student from a route, the route changes were saved.

Workflow distinction: Use Disable Transport when the student should no longer use transport. Use Delete in the route edit screen when the student should be removed from that route.
